Hazardous Weather

Hazardous Weather

Thunder chances will continue early this week, as upper flow transitions to southwesterly allowing disturbances to approach from our west. Tuesday at this point appears to have greatest potential for broader coverage and stronger storms.

Widely scattered thunderstorms will affect much of southeastern New Mexico and west Texas today. Heavy rainfall and localized flash flooding will be the main threats, but some of the stronger storms could produce damaging winds, hail and frequent lightning strikes.

Hazardous Weather

Flood Safety

Rain this morning may worsen or re-aggravate flooding conditions, particularly within the swath of Saturday night's heavy rain from Sherman/Denison and Bonham to Greenville and Sulphur Springs. The water may rise quickly so keep these safety tips in mind:

- **Never drive through flooded roadways! Turn around; don't drown.**
- **Do not attempt to cross flowing streams.**
- **Avoid areas that tend to flood readily.**
- **Do not park your vehicle along creeks and streams or drainage areas, particularly during heavy rain.**
- **Be especially cautious at night when it is harder to recognize flood dangers.**
